

SANYA

With our SANYA street light, you choose a luminaire using 100% green energy with its elegant design, SANYA reduces your energy consumption and installation costs.

SANYA is designed to produce in all climatic conditions due in particular to the wind turbine operating from 1.5 m/s, and its high efficiency photovoltaic panel

Choose SANYA for its smart sensor detection, its dimmable lighting, and its communicating application via a wireless network which will facilitate the management of luminaires and ensure better maintenance.

Components

Lighting :	LED 70W with optional dimmable system, 7350 lumens
Wind turbine:	HOYI 300W Nominal power at 12 m/s
PV :	starting at 200w depending on location Bifacial cell
Storage :	Optional super capacity batteries provide 15 years of life
Sail: f	Fully customizable

Application

Installation and commissioning by smartphone

Remote system monitoring and status

Hourly, daily and monthly online report

Proactive automatic maintenance

Adjustment and modification of lighting and load profiles in web Access

User-friendly web interface
